Product Designer with 3+ years of industry experience as a designer and developer

## Experience

**Walmart International** - Product Designer Apr 2019 - Present

- Designed Freight Billing tool for Suppliers and DC Managers which will save their ~3hrs every day by completely automating the process.
- Designing a platform to help the replenishment team to reserve items for e-com. The platform is expected to fence 1000+ high valued items per day to increase e-commerce sales in international markets.
- Designing Plan Your Day platform which will increase the DC manager's efficiency by helping them plan daily operations across DC.

**The H2 Group** - Product Designer Sep 2016 - March 2019

- Collaborated with CEO & developers to redesign Shakti Warrior's admin portal & led the overall user experience.
- The new design was launched to 12 different schools with more than 500 students are currently enrolled in the program.

**Udacity** - Product Design Intern June 2018 - Sep 2018

- Designed and iterated on the Alumni Portal & shipped it to 50,000+ Udacity alumni while collaborating with PMs, devs, researchers and community managers.
- Redesigned and integrated referral system into the product to improve the visibility, expected to increase traction by 2.5% quarterly for the program.
- Redesigned graduation experience to make it more celebratory, shipped it to 10M registered students while they graduate.

**Findability Sciences** - Jr. Software Engineer Mar 2015 - Jul 2016

- Collaborated with VP (tech), country head, engineers, and client and helped in developing a user-friendly product.
- Led a team to design & develop an android application of 'Ta-dah' and published it in Play Store.

## Selected Projects

**Screenless Typing** - Funded by Google (\$50,000)

Led UX design of aural keyboard for blind people using hand gestures as inputs and aural cues to provide feedback. The new design improved typing efficiency while keeping the hands free.

**Power 2 Patients** - Funded by AHRQ (~\$300,000)

Collaborated with researchers to design an interactive prototype for patients with chronic heart failure for their self-care management. The new design filled applied knowledge gaps of patients.

## Education

**Indiana University** — *MS in Human-Computer Interaction*

2016- 2018

GPA: 3.92/4.0

**DIEMS** — *B.E in Computer Science and Engineering*

2010- 2014

## Skills

### Formative

User Interviews, Competitive analysis, Surveys, Contextual Inquiry

### Generative

Storyboarding, prototyping, Affinity Mapping, Personas, Wireframes, Journey Maps

### Summative

Heuristic Evaluation, Usability Evaluation, Cognitive Walkthrough

### Tools

Sketch, Figma, Framer.js, InVision, Principle, After Effects, Illustrator, Photoshop

### Programming

HTML, CSS, JS, JQuery, React, PHP, Java, SQL, Android, Python

## Published Apps

**Ta-dah:** New entertaining social media video sharing platform.
